

# OUR CAPABILITY

Specialised solutions, led by expertise

We create lasting value  
for our clients and  
our people through  
delivering the highest  
quality services.

## About WPF

WPF is a leading specialist of multi-discipline engineering services to the Australian Energy sector. We offer a fully integrated service to clients, combining a manufacturing and fabrication facility with the capacity to install, service and repair specialised equipment, both onshore and offshore.

### A reputation for excellence

Since the beginning, our experience and focus on quality have positioned us as a market leader, with a reputation for technical expertise and intelligently engineered solutions.

This reputation has been earned through maintaining strong client relationships, delivering exceptional service and pursuing an uncompromising commitment to engineering excellence within the context of safe work practices.

Our clientele includes leading companies in the energy, construction and manufacturing sectors, who trust us to deliver reliable solutions that drive efficiency and success in operations.

### Award winning delivery

WPF was named Contractor of the Year at Santos' 2023 Director's EHSS Awards for our exceptional work supporting offshore activities in Western Australia. This efficiency project reinforced our position as a key industry partner in the development of unique, fit-for-purpose solutions for complex offshore decommissioning scopes.

### Serving our customers with the best team

We have continued to evolve our service delivery. Available where our customers need us most, we have locations in Perth, Karratha and Darwin.

### Growing presence

In 2022 we became a part of the Duratec Limited Group. We are driven by better solutions, ideas and opportunities to improve and as part of Duratec Limited, we have strengthened our range of integrated service offerings.

### Operations driven by our values

#### Quality

Our commitment to quality is a guarantee to our clients that they can trust in the excellence, reliability, and precision of our service offerings.

#### Accountability

Accountability is our cornerstone, where individuals take ownership of their responsibilities and act with transparency, holding themselves accountable to our collective success.

#### Innovation

Investing in innovative solutions allows us to identify new opportunities, improve processes, and continue to adapt to the ever-changing industry landscape.

# Our Difference

## Benefit from our expertise

Our staff are highly trained, incredibly skilled and exceptionally enthusiastic, not to mention extremely dedicated to producing high-quality, on-time and cost-effective outcomes.

## Our commitment to improvement

With constant improvements being made in materials, techniques and methodologies, we stay at the forefront of any new developments that can enhance the service we provide. This means you benefit from the newest technologies and research.

## We drive innovation

Designed specifically for pipe and pressure vessel welding, the addition of a collaborative welding robot offers plenty of benefits to both WPF and our clients. We are the first company in Western Australia to implement this technology, innovating the way our Perth workshop operates.

## Expect a commitment to HSEQ

Our best-practice health, safety, quality and environmental management systems enable us to deliver projects safely, to a high standard and without harm to the environment. We aim for continual improvement in all that we do and are focused on ensuring our business systems enhance and support the evolution of our company.

## Partner with an accredited contractor

Our designs and proposals always adhere to the most up-to-date standards such as ASME IX, AWS D1.1, API and NACE MR0175. WPF has access to coating inspectors who are accredited by the National Association of Corrosion Engineers (NACE) and non-destructive technicians who are also highly trained and accredited by globally recognised authorising industry bodies.

## Quality Assurance

Our commitment to quality, coupled with our ability to develop and maintain our weld procedure specification library in line with the latest codes and standards, allow us to deliver high-quality project outcomes, as well as building and maintaining long-term client relationships.

## Set up for excellence

Our fully equipped workshops are geared to provide an effective working environment for all of the company's fabrication and maintenance activities, as well as support for field crews engaged in on-site operations.

Our relationships  
are the driving force behind  
our business.

### Certifications and Associations

# Key Capabilities

WPF has the capability to provide a range of professional services to our clients across various industries. Our team of industry professionals caters to every stage of the lifecycle of your asset, from engineering and fabrication to installation and maintenance.

## Site Services

Our comprehensive range of site services enable you to optimise your use of core production assets and labour. With our skills and experience in maintaining, upgrading and refurbishing key assets, you can benefit from minimal production losses while deferring the costs of new asset investment.

## Pipe Spooling

Our expertise in pipe spooling encompass precision cutting, welding and assembly of pipes to exact specifications. We specialise in both standard and custom spooling solutions for various industries, including energy and industrial sectors.

## Specialised Fabrication

Our engineering team consists of qualified mechanical, civil and petroleum engineers, each bringing their own area of expertise to your projects. They excel in the fabrication of specialised components and structures tailored to the unique requirements of our clients.

## Robotic Welding

Our cutting-edge welding robot is designed to revolutionise the way we approach spool welding, offering precision, speed, and reliability like never before. Designed specifically for pipe and pressure vessel welding, this new technology offers plenty of benefits to both WPF and our clients.

# Extended Capabilities

## Protective Coatings

On the back of the success of our parent company Duratec's abrasive blasting and protective coatings facility in the Karratha, we have extended our capabilities to provide abrasive blasting and protective coating services out of our custom-built Darwin workshop, located in the East Arm precinct.

Servicing nationwide, this facility will ensure that all project delivery requirements can be met with in-house services, putting the needs of our clients first.

Duratec's in-house NACE qualified coating inspection team will be on-hand to witness and manage the quality expectations of our energy sector clients.

## Consider us an extension of your team.

Engaging with us gives you access to a team of industry professionals dedicated to exceeding client expectations by delivering high-quality, safe, on-time and cost-effective projects with 24/7 support.

## Duratec Limited

WPF is proud to be part of the Duratec Limited group. Duratec is a national engineering, construction and remediation business with the capacity to deliver large, complex and sustainable projects. Duratec's passion and proven delivery has positioned it as a market leader with a reputation for technical expertise, value for money and innovation.
