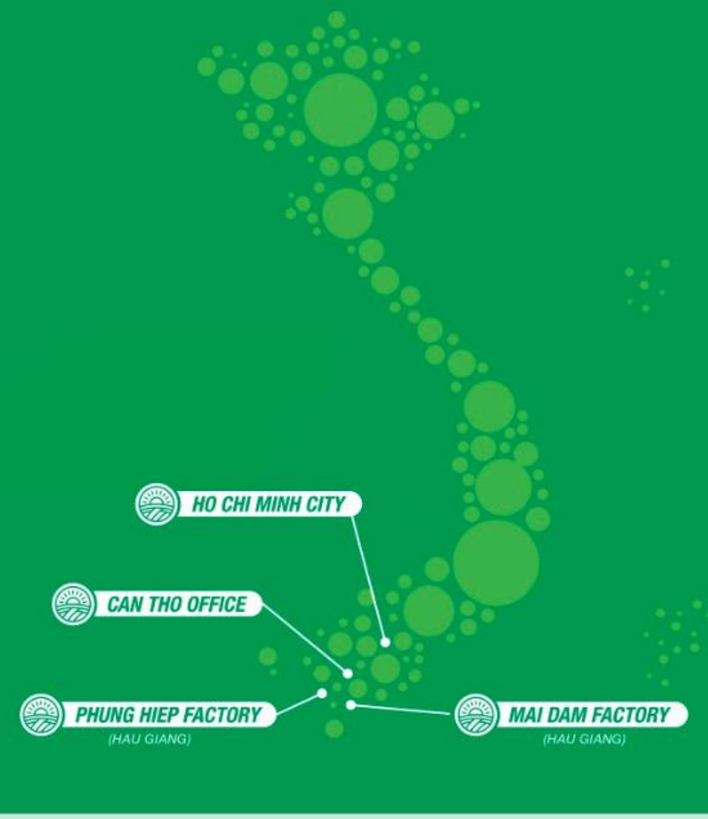
Green Production - Golden Quality

TROPICAL FRUIT FROM VIETNAM
Juice & Concentrate



About Us

Tien Thinh Group Joint Stock Company (formerly Tien Thinh Agricultural Product Processing Co., LTD) was established in 2014, at Phung Hiep District, Hau Giang Province, Vietnam. Tien Thinh Group specializes in processing and exporting juice concentrates, puree, and soft dried products from Vietnamese tropical fruits such as passion fruit, dragon fruit, soursop, calamansi, ect.

For years of development, Tien Thinh Group has constantly strived, updated and improved the quality of products and services in order to produce the highest quality products, which meet the growing requirements of domestic customers as well as international markets. Thanks to that, Tien Thinh company has always been in the top of Vietnamese leading agricultural product processing and exporting enterprises for many years.

With the motto “safety, quality and economy”, Tien Thinh factory has been installed with modern European production lines with a capacity of 11.000 tons a year. Also, the application of strict quality management measures according to the international standards: as FDA, HACCP, ISO 22000, BRC food, KOSHER, HALAL has been implemented since the early days of establishment.

In 2019, the company officially entered the field of providing logistics service chains specializing in serving the export agricultural product by establishing Hanh Nguyen Food One Member Limited Liability Company (a subsidiary of Tien Thinh Group). Specializing in providing services: preliminary, selection & packing, agricultural products, leasing cold & cool storage, irradiation services, transportation services, testing agricultural product, etc.

In september 2021, to carry out the mission of “bringing Vietnamese farmers to the world market”, Tien Thinh transforms business model into joint stock company model, which allows the company to achieve the goal of becoming a leading group in Vietnam and reaching out in the region.

Achievement

Thanks to the location at The Mekong Delta (known as the fruit capital of Vietnam), we have worked closely with our partners to take advantage of the material inputs, control the value chain from fields to customers. Over the years of development, we have achieved several remarkable milestones:

70

Markets worldwide

Closed loop

logistics supports from fields to customers

06

International food safety standard applied

50

Annual turnover growth rates

12

Thousand tons annual production capacity of the factory

"Green Production - Golden Ouality"

In coming time, Tien Thinh keeps on focusing to produce the four key kinds of fruit such as: Calamansi, Passion fruit, Soursop, and Red Dragon fruit, which are cultivated as well as oriented developing with the large yield.

PASSION FRUIT

Cultivated in highlands (Lam Dong, Dak Lak, Dak Nong, Kon Tum, Gia Lai),North central (Nghe An, Ha Tinh, Quang Tri), and Northern Midlands and Mountains (Son La, Cao Bang, Ha Giang, Lao Cai, Hoa Binh). Currently, Tien Thinh is mainly collecting passion fruit raw material at highland provinces base on connecting to local purchasing agents and companies with yield is up to 3.500 metric tons.

CALAMANSI

Considered as advantage raw material. Tien Thinh gets a lot of advantage of this kind of fruit which is cultivated at our location, the low cost for transportation, abundant supply through connected large purchasing agents located in the material. Calamansi fruit is cultivated mostly in Hau Giang, Can Tho, Ben Tre with the collecting yield is 3.000 metric tons.

SOURSOP

It is grown up at Hau Giang, Can Tho, Tien Giang, Vinh Long, Soc Trang, Dong Nai, Ba Ria - Vung Tau provinces. Based on signed the exclusive collecting raw material contracts to the local associations, Tien Thinh has collected about 2.000 metric tons.

RED DRAGON FRUIT

To be one of the main fruit in Mekong delta and oriented to reach 40.800 hecta in 2020. Some provinces are mostly cultivating red dragon fruit such as Long An, Tien Giang, Binh Thuan, Soc Trang, Vinh Long, Tra Vinh, Tay Ninh. We have collected over 3,000 metric tons of red dragon fruit.

Aiming at building a key export fruit processing industry, the source of raw materials will be concentrated in the direction of large production, to ensure sustainable raw material areas in the future. Tien Thinh has built up following solutions:

Keep on connecting and enlarging the raw material area by focusing to collect material at specialized cultivation and the large yield areas as well.

Improving the raw material transportation methods and post-harvest storage to minimize the loss and ensure the freshness of the finished fruit products from collecting points to processing plants.

Raw material must be tested to assure to buy qualified fruits after harvested by both quality and quantity, the technical staffs inspect directly at the farms as well as purchasing agents. Ready to instruct and advise the new & updated cultivation methods to farmers. Consulting about seeds, fertilizers, pesticides, which are allowed to use. Closely monitor the process of cultivation and pest control by implementing the integrated pest management (IPM), 4 right principle in agricultural cultivation, supporting good agricultural production practices (VietGAP), recording cultivation history, traceability in advance to ensuring the purchased raw materials always meet the input standards.

Orienting the farmers in changing cultivation from scattered production scale to concentrated and specialized scale with large areas. Actively supporting farmers to participate in the farmers association. Organizing the seminars & technical advice about implementing cultivation and purchasing plans. Signing exclusive contracts of collecting raw material to farmer associations, ensuring a stable output for farmers to contribute to the development of sustainable raw material areas. To develop quality value chains in agricultural production (from cultivation, production purchasing, processing to consumption.)
