ABOUT CENTURION

Centurion is a global leader in the supply of equipment rentals and services to critical industries, including mining, renewables, oil and gas, construction, defence, infrastructure, and agriculture.

Operating across five key regions – Asia Pacific, US, Canada, UK and Europe, and the Middle East and North Africa, we deliver practical, cost-effective solutions through innovation, collaboration, and a deep understanding of industry needs. At Centurion we are focused on safety, sustainability, and working more efficiently to support our clients, even in the toughest and most remote conditions.

Throughout the Asia Pacific region, Centurion connects global capability with local expertise to deliver effective solutions tailored to our clients' needs. From remote mine sites and wind farms to hydroelectric power plants and major infrastructure projects, we deliver the right solution, regardless of the scale or complexity.

Our offerings in the Asia Pacific region

Lifting Services – certified lifting, lowering, and positioning rental equipment, along with mechanical and inspection services.

Power & Equipment – portable rental power solutions with mechanical services, technical and on-site operator support.

Subsea Services – specialist rental equipment and services for subsea drill support, construction, inspection, repair, maintenance, and decommissioning, supporting both ROV and diver operations.

Water & Wastewater Solutions – end-to-end treatment systems for potable water, domestic wastewater, process water and wastewater, and industrial wastewater.

Accommodation & Modular - portable accommodation for workforce housing, buildings and site infrastructure, as well as full site management services.

OUR CAPABILITIES

LIFTING, POWER & EQUIPMENT, AND SUBSEA SERVICES

Centurion delivers specialised lifting, power, and subsea rental equipment solutions, supported by inspection services and technical support, for critical operations in oil and gas, mining, renewables, and construction. With one of the largest equipment fleets in the APAC region and strategic hubs in Perth, Karratha, Darwin, and Singapore, we're ready to mobilise and respond when you need us.

Our clients work in industries where equipment performance, compliance, and availability are crucial. That's why every asset in our well-maintained fleet is fully certified and job ready, giving you confidence from day one and helping keep your operations on-track.

But we're more than just an equipment provider. Whether it's a shutdown in the Pilbara or an offshore campaign in Southeast Asia, we're on hand to scope, deliver, install, and support our equipment onsite. From winches, hoists and spoolers to air, fluid, and power systems, our team works side by side with yours to ensure everything runs safely and smoothly.

Lifting & Rigging

Our lifting and rigging equipment is fully certified, maintained, and ready to go when you are.

- Winches, Chain Hoists, Spoolers, Jacks
- Rigging Equipment, Load Cells
- Portable Cranes, Cable Handling Gear
- Air & Fluid Power Units
- Inspection & Spooling Services
- Non-Destructive Testing (NDT).

Power & Equipment

We deliver portable power systems and hydraulic and air powered tooling, plus equipment servicing, on-site operators, and technical support.

- Compressors, Hydraulic Power Units
- Aftercoolers, Desiccant Dryers, Heat Exchangers
- Steam Generators, Sand Filters.

Subsea Services

Centurion supports every stage of an offshore asset's lifecycle, delivering tailored, fit-for-purpose packages designed around your project, environment, and vessel needs.

- Back of Deck & Subsea Tooling Packages
- ROV Tooling & Systems, Diver Tools
- Decommissioning Equipment, Power Packs, Tensioners
- Deck Cranes, Winches, Survey & Deployment Equipment.

Inspection, Certification & Asset Integrity

Our team provides end-to-end inspection and technical services to ensure lifting, power, and subsea equipment remains safe, compliant, and reliable, whether it's part of our rental fleet or client-owned.

Our core capabilities include:

- Lifting and lifted equipment inspection including Cargo Carrying Units and Periodic Offshore compliance checks
- Non-Destructive Testing (NDT) using modern techniques including ECI, MRT, MPI
- Asset integrity assessments and proof load testing
- Wire rope inspection, socketing, and replacement
- Pre-loadout quality control (QC) inspections, DROPS, LOLER/ POWER surveys
- Height safety and rigging equipment inspections
- Hose management and pressure testing evaluation
- Drone based survey inspections
- Internal Inspection Support Programme (IISP)
- Mine site inspection and compliance support.

By partnering with Centurion, clients reduce the risk of costly downtime, confident that every asset is compliant, safe, and reliable.

WHY CHOOSE CENTURION?

A partner you can rely on

Our clients know we'll do what we say and meet our commitments. No shortcuts, no surprises.

One of the region's largest specialised equipment rental fleets

Our large fleet, combined with strategically located rental and service hubs, allows us to support complex projects with the right equipment and practical, on-the-ground solutions.

Decades of industry experience

We bring decades of hands-on experience and are known for our attention to detail and ability to deliver efficiently.

Close to site, ready to mobilise

With teams and equipment based in Perth, Karratha, Darwin, and Singapore, we're ready to go wherever you need us.

End-to-end technical support

From scoping and planning to delivery, installation, operation, and certification, we offer a full-service solution under a single purchase order, making life easier for your team.

Global strength, local focus

As part of the Centurion global network, we bring international best practice, shared expertise, and access to global personnel, enabling successful project outcomes for our clients across the APAC region.

Full service back-of-deck and subsea equipment support

We're a true one-stop shop for back-of-deck and subsea equipment support, from spoolers and winches to lifting, power, and fluid equipment, all fully supported by our NATA accredited inspection team.

Teamwork that delivers

We work side by side with our clients to deliver practical, fit-for-purpose solutions, tackling challenges that others walk away from.

“

“Our clients come to Centurion because of our know-how. We make it simple, with attention to detail and decades of experience behind us, they trust us to deliver reliably, every time and we don't shy away from a challenge”

KEVIN GRIFFITHS

MD, Centurion Lifting Services

INDUSTRIES WE SUPPORT

Mining | Oil & Gas | Renewables
Subsea & Marine | Construction & Infrastructure

CASE STUDIES

CLIENT
Fugro

PROJECT
Replacing an ROV umbilical and an offshore crane rope, and conducting inspections and load testing

Centurion was engaged to support time-critical maintenance on the Fugro Etive during a short port call at AMC Henderson. The scope included replacing a 3,500m ROV umbilical, a 3,506m offshore crane rope, and conducting NATA accredited inspections and load testing.

RESULTS

Using locally based equipment and personnel, we delivered:

- Safe and efficient execution without disrupting other contractors
- On-time delivery that kept the vessel's mobilisation on track
- Cost and time savings through local deployment and expertise
- Positive client feedback praised our efficiency and ability to keep projects on schedule.

CLIENT

**Mermaid Subsea Services
(Thailand) Ltd**

PROJECT

**Decommissioning 335km of
Subsea Pipeline**

Centurion is providing a package of subsea equipment and technical support for one of APACs largest pipeline recovery campaigns, involving approximately 335km of aging subsea infrastructure.

RESULTS

- Phase 1 (2024/25): Centurion delivered a customised equipment package including cutting tools, hydraulic power units, deployment frames and recovery gear to remove 64 pipelines up to 21km long, with many encased in concrete weight coating. Tools were adapted in the field to suit variable pipeline conditions.
- Phase 2 (2025): A further 12 pipelines are being removed over a 3-month, 24/7 campaign across two vessels. Centurion's teams in Singapore and Australia are supplying a package of subsea tools, control cabins, recovery systems and offshore-certified equipment.

The project highlights Centurion's ability to manage complex scopes, mobilise quickly from regional hubs, and work closely with clients to find practical solutions as challenges arise.

CLIENTS

**Rio Tinto, FMG, Roy Hill,
Mineral Resources, and others**

PROJECT

**Multi-faceted equipment hire
packages to support critical shutdown
and maintenance activities**

Centurion has built a strong track record delivering fast, tailored equipment solutions for complex jobs, especially those that fall outside the norm. Many are not everyday scopes, and they often require unusual or hard to source equipment, tight turnaround times, and experienced hands to get the job done safely and efficiently.

We've supported a range of clients with customised packages involving winches, snatch blocks, power packs, compressors, spoolers, load cells, hoists and more, mobilised in just a few days. Where others struggle to find the right equipment or pull it together quickly, we can. It's our mix of experience, extensive fleet, and a problem-solving mindset that sets us apart. That's why clients come to us when the job is unique, time is tight, and the stakes are high.
