

#### OUR WALL PLAQUE:

Only promise what you can deliver,  
then deliver more than you promised.

#### The rules we live by

- We are open and transparent; you can ask us - almost - anything.
- Only the best quality is good enough for us.
- We are maker independent and our knowledge is extensive. We can service any make or type.
- Our prices are fair and there are no hidden extras or charges.
- We operate worldwide, but produce exclusively in Europe.

#### Committed and Responsible

Opting for true commitment means making the right choices. We do not only care for our customers, we also care for our employees and the world we live in. We try to do things in a responsible manner. Our office building uses geothermal energy, our energy

is green and we compensate for our ecological footprint (due to flying worldwide) with durability projects.

We believe in a happy worker and encourage our employees to develop themselves and offer them profit-sharing options.

We have a CSR committee that points out projects we should support, be it youngsters that are job trained, a school in Gambia or a hospital ship. For us, being entrepreneurs is about more than just making a profit.

## AEGIR-MARINE, BUILT ON SERVICE

Right from the start in 2000, we were clear about one thing:  
AEGIR-Marine would be a service company aimed at the customer.

Not because it sounds good, but because that's what we really want: *to put the customer first.*

We employ truly passionate engineers willing to provide excellent service. The kind of service that is often hard to find. The kind of service we like to get ourselves. get ourselves. We ourselves would like a personal answer from a dedicated specialist. So when you call us, you will be connected to the right person immediately. No voicemails that will be answered 'some day'; ONE CALL should do it.

#### AEGIR-Marine does things differently

We work make-independent and keep a large stock so any PRIME Part can be shipped within the hour. We avoid lengthy delivery times; we would rather

bring it hand-carried. If that is what it takes, then that is what we will do. And we will do it with a smile because that is the way we do business.

#### What to expect from AEGIR-Marine

- Stern tube seal service
- Propulsion service: CPP - FPP - (bow) thrusters - IHR
- PRIME® Parts
- Stabilizer repairs
- Controls
- Underwater repairs
- Alignment

# THE THINGS AEGIR-MARINE CAN DO FOR YOU.

We offer a complete set of services for your propulsion installation. You can call us for single jobs such as stern seal renewal, blade repair, bow thruster maintenance and such. You can also ask us for turnkey projects and leave the whole job to us. You can trust us to deliver the service you deserve. It just takes ONE CALL to get the job done.

## BOW THRUSTER AZIMUTH THRUSTER

Repair, maintenance or a complete overhaul. Including metallurgic repair

## CONTROLS

Repair or renewal of the print unit or parts of it. In house or in situ.

## STABILIZER

Repair and renewal of the stabiliser's seals.

## OD-BOX

Repair or overhaul of the OD box.

## STERN TUBE SEALS

We offer AFT and FWD seals suitable for all major installations. We also provide complete custom-made retrofits. This includes underwater repairs.

## CPP

Repair, maintenance and overhaul of the hub and blade foot components. We also offer shaft withdrawal, metallurgic repair and underwater emergency repair.

All repairs are done under class if required.
