MANUFACTURE

Our knowledgeable Project Engineers can design and manufacture any piece of equipment you need, using the highest quality components and years of industry experience.

RENTALS

Renting our equipment is a cost-effective solution, available for short or long term periods. We provide top quality instruments and machinery, fully serviced and calibrated to your requirements.

SERVICES

To ensure all your requirements are exceeded, we offer a complete range of services ranging from a fully equipped workshop to component and hydraulic repair and testing.

CALIBRATION

We operate a NATA accredited Calibration Laboratory in accordance with ISO/IEC 17025. The calibration laboratory is equipped with Dead Weight Testers and Hydraulic and Digital Calibrators.

TRAINING

We have recently introduced a series of professional workshops and training courses. Please contact us for dates and times.

TRIDENT 700 SERIES TEST FLUSH HPU

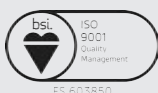

One of Trident's standard 316SS systems manufactured and held in stock for rental or sale. Electric or air driven LP and HP pumps, large reservoir, filtration, accumulation and control.

Suitable for oil or water based fluids and supplied with all the accessories you need.
