

At Lifestyle Bakery, creating healthy, nutritious bakery products is not just a trend we've jumped on – it's been at the heart of everything we do for over 30 years. Because 62% of Australians now choose their food based on health and nutrition*. We bake for all of them.

Our Philosophy

More than Gluten-Free

The conversation around food has changed. More Australians than ever are paying attention to what they eat – not because they have to, but because they feel better when they make healthier choices.

At Lifestyle Bakery, we've always believed that great-tasting bread and bakery products, and genuine nutritional value, shouldn't be a compromise. Our products are made for real tables, real people, and real appetites, not just those with dietary requirements.
