DAL / SINCE 1929

Sparkling wines are the pride of our family's' tradition. The vocation was born after the war from the intuition of its founder who, grasped the American spirit of the celebrations under the banner of "wine and champagne", was able to meet the need for the only of the two elements that Italy lacked at the time thus marking the transition from the "Romanelle" to the production of sparkling wine with the Charmat method.

A project that required the attention of time and a lot of experimentation, finally leading us to celebrate the birth of a line of wines in total balance with the spirit and history of our company; a company with a young soul that reconfirms, with the Colli Line, the desire for innovation, bringing with it all the treasures that tradition has in store for the historic Cantine Silvestri.

The beating heart of Lazio, a fertile and wild territory that for millennia has offered, to those who know how to tame it, safety and products of the earth that are unique in the world. The Castelli Romani are reflected in the reflections of these wines extracted from selected grapes. A flight among the fronds of the trees of these hills that gently drink in the two most beautiful lakes of our territory.
