

JS Audio Solutions delivers world class audio and systems design services across the ANZ and surrounding Pacific regions. As the official distributor of **1 SOUND**, we supply unique and premium, bespoke loudspeaker systems designed for pristine clarity, sleek aesthetics, and high-SPL performance in High-end Residential, Commercial and Live Sound settings.

Headed by industry veteran Juan Soothill, an audio solutions specialist and certified trainer for **DirectOut Technologies**. Our team bridges the gap between complex audio network architectures and immersive, high-end electro-acoustic experiences. Whether specifying discreet architectural speakers or deploying complex, multi-format digital audio networks and speaker designs, JS Audio Solutions provides the hardware, training, and technical expertise that modern integrators demand. Come discover the range!
