

studiotech Australia

a division of **everlz**

Integration. Innovation. Performance.

Powered by innovation. Fuelled by expertise...

Building technology that makes your team unstoppable...

Driven by pride & a burning desire to deliver the extraordinary.

Who we are

Local delivery, global backing

Studiotech Australia delivers **media-technology solutions** for **Broadcast, Defence, Government, Education, Venues/Stadiums** and **Enterprise** customers across **Australia** and **New Zealand**. Established in **2012**, we combine **local Australian** responsiveness with the reach and backing of the global Studiotech Group (a division of Evertz Microsystems) to deliver reliable, long-life systems and support.

We specialise in solution architecture & design, systems integration, cabling/containment, commissioning, training, ongoing support, and modular control-room technical furniture (operator consoles, racks and workstations) assembled and built locally!

We are the master distributor in Australia for a select set of premium vendors with deep manufacturer relationships that accelerate delivery and escalation support.

Solution Areas

Every solution. Every environment. Every time.

Broadcast & Media Infrastructure

Engineered systems that connect sites, workflows, and operations seamlessly

Control Rooms

Designed around operators; built for speed, clarity, and control

Live Production

Real-time production for broadcast, sports and live events

Pro AV & Collaboration

Simple to use. AI-ready. Built to just work

RF & Media Transport

Moving critical signals, reliably, at scale

Technical Furniture

Purpose-built furniture designed around systems, not added as an afterthought

Cloud Solutions

Cloud-native workflows from contribution to consumption

Lifecycle & Modernisation

Modernising and supporting systems through their entire lifecycle

SOLUTION AREAS

Broadcast & Media Infrastructure

Engineered systems that connect sites, workflows, and operations seamlessly

Signal Routing & Distribution

End-to-end video, audio and data routing solutions for broadcast facilities of any scale.

Playout & Automation

Integrated playout systems with scheduling, automation and redundancy built in.

Multiviewer & Monitoring

Scalable multiviewer and signal monitoring solutions for master control and production environments.

IP & SDI Infrastructure

Hybrid IP and SDI infrastructure design, supply and integration for modern broadcast facilities.

Orchestration, Control & Analytics

Evertz MAGNUM-OS, the central platform at the centre of every system, unifying control, orchestration, monitoring and analytics across SDI, IP and hybrid environments.

SOLUTION AREAS

Control Rooms

Designed around operators; built for speed, clarity, and control

Operator Console Systems

Ergonomic control room console solutions designed around operator workflows and long-duration use.

Video Wall & Display Systems

Large-format display walls with processor, mounting and cabling infrastructure fully integrated.

KVM & Signal Management

Keyboard, video and mouse switching solutions for multi-system operator environments.

Monitoring & Alarm Systems

Centralised signal monitoring, status display and alarm management for mission-critical operations.

Room Design & Acoustics

Control room layout design incorporating sightlines, acoustics, lighting and cable management.

SOLUTION AREAS

Live Production

Real-time production for broadcast, sports and live events

Production Switchers & Mixers

Live production switcher and audio mixing solutions for studio, OB and event environments.

Camera & Acquisition Systems

PTZ, studio and field camera systems with full integration into production workflows.

Graphics & Playout

Real-time graphics, replay and clip playout systems for live broadcast and event production.

Intercom & Communications

Production intercom and comms systems supporting crew coordination across complex live environments.

OB & Flyaway Packages

Portable and self-contained production systems built for outside broadcast and remote deployment.

FEATURED FOCUS

Sports, Live Events & Entertainment

Broadcast-grade technology for every live moment

Live Production Infrastructure

Full end-to-end IP broadcast workflows for venues and stadiums.

Fan Engagement Systems

From LED walls to second-screen experiences, delivering content to fans everywhere.

Replay & Highlights

Evertz DreamCatcher and Bravo Studio for instant, operator-controlled replay.

Commentary & Commentary Routing

Low-latency audio and commentary distribution systems built for the biggest events.

IP Signal Distribution

SMPTE ST 2110 infrastructure to move video, audio and data at broadcast grade.

SOLUTION AREAS

Pro AV & Collaboration

Simple to use. AI-ready. Built to just work

Meeting Room AV

Fully integrated meeting room systems with display, audio, camera and control in a single solution.

Digital Signage

Managed digital signage networks for corporate, education and public-facing environments.

Presentation & Lectern Systems

Presentation switching, control and distribution solutions for boardrooms and lecture theatres.

Video Conferencing Integration

Seamless integration with Teams, Zoom and Cisco platforms across single and multi-room deployments.

AV Control Systems

Centralised AV control via touchpanel and automation for simplified room management.

FEATURED FOCUS

Pro AV Reimagined for Today's World of AI

Where AI meets the Pro AV world

AI-Powered Media Management
BRAHMA AI - Delivers intelligent content orchestration, automation and AI assisted decision support.

Intelligent Video Walls
VuWall Video Wall - Orchestrates dynamic, context-aware visual environments automatically.

Operator Intelligence
G&D - KVM and operator workflow systems designed for high-pressure multi-source environments.

Media Workflow Core
Evertz Bravo Studio - Core ingest, processing and playout engine for the intelligent operations workflow.

Advanced Replay & Review
Evertz DreamCatcher - Broadcast-grade replay and annotation, applied to real-world environments.

SOLUTION AREAS

RF & Media Transport

Moving critical signals, reliably, at scale

RF, SATELLITE & RF OVER IP
End-to-End Signal Delivery Solutions

SATELLITE RECEIVERS & DEMODULATORS
High performance DVB-S/S2, DVB-S2X and DVB reception
Professional BDCs for broadcast and distribution

RF MODULATION & PROCESSING
SAB, DQPSK, ATSC, PAL/NTSC modulation
PSK, QAM and IP processing for reliable signal delivery

RF OVER IP SOLUTIONS
High density RF over IP distribution
Low latency, high reliability
Multi-site and cloud-ready

UP/DOWN CONVERTERS
Wideband up/down converters
LNBs and BUCs
Frequency agile and multi-band options

DISTRIBUTION & AMPLIFICATION
RF distribution amplifiers
Splitters, combiners and hybrid/split systems
Suit for mission-critical environments

Flowchart: SATELLITE → RECEIVE & DEMODULATE → PROCESS & MODULATE → DISTRIBUTE → IP OVER IP NETWORK → RECEIVE & MONITOR → DELIVER

Fibre & IP Transport
Signal transport over fibre and IP networks for contribution, distribution and remote production.

Wireless RF Systems
In-ear monitor and wireless microphone systems for live production and broadcast applications.

Satellite & Microwave Links
Point-to-point microwave and satellite contribution solutions for remote and field operations.

Signal Encoding & Decoding
Hardware and software encode/decode solutions for contribution and distribution workflows.

Network Infrastructure
Managed network switching and routing infrastructure purpose-built for broadcast and media environments.

SOLUTION AREAS

Technical Furniture

Engineered for the people who run the technology.

Control Room Consoles

TBC Consoles SmartTrac and SmartCart systems: modular, height-adjustable, operator-focused.

Operator Workstations

TBC Custom and standard workstations designed around monitor configurations, KVM and cable management.

Rack Integration

In-house rack build, patch and label capability with full QA, testing and certification.

Monitor Wall Infrastructure

Structural and cabling solutions for large-format display walls in control and operations rooms.

Custom Design & Build

From concept drawings through to delivery: bespoke furniture built in our Hornsby workshop.

SOLUTION AREAS

Cloud Solutions

Cloud-native workflows from contribution to consumption

Cloud Contribution & Ingest

evertz.io XChange brings live feeds in from anywhere with automatic phone-home, rich telemetry and remote control of any encoding device.

Cloud Replay & Highlights

DC-ONE delivers broadcast-grade replay, clipping and highlights for live events, fully cloud-hosted and operator-driven.

Cloud Production

Bravo Studio production tools, with Mediator-X enterprise media asset management and StreamPro automation for cloud-native workflows.

Cloud Playout & Channels

evertz.io STREAM creates FAST, OTT and broadcast channels in minutes with AI live captioning, record-as-a-service and pay-as-you-use billing.

Multi-Platform Distribution

Secure delivery to OTT, FAST, social platforms and traditional broadcast with real-time analytics and global scale.

SOLUTION AREAS

Lifecycle & Modernisation

Modernising and supporting systems through their entire lifecycle

Assessment & Migration Planning

Audit of existing infrastructure with structured, phased migration plans from SDI to IP that keep operations live throughout the transition.

Standards-Led Modernisation

Upgrades aligned to current industry standards including SMPTE ST 2110, NMOS and AES67, future-ready by design.

Maintenance & Support Agreements

Tailored support contracts covering preventative maintenance, remote monitoring, on-site response & centralised warranty management.

Spares, Logistics & Refresh

Managed spares inventory; fast-turnaround logistics & equipment refresh with trade-in & disposal of legacy gear.

Training & End-of-Life Planning

Operator & technician training at handover and ongoing, with proactive end-of-life planning & budget forecasting.

Systems Integrator Capabilities

End-to-end design, build and support of complex broadcast, AV and IT systems

Management, Consultation & Design

- ▶ Project Management
- ▶ Consultation & Solution Architecture
- ▶ Concept & Detailed System Design
- ▶ Custom Technical Furniture & Facility Design
- ▶ Handover Docs, CAD, QA, FAT/SAT, As-builts

Installation

- ▶ Hardware & Equipment Installation
- ▶ Media Wall & Infrastructure Installation
- ▶ Structured Cabling, Copper & Fibre Optical
- ▶ Cable Termination, Testing & Certification
- ▶ OTDR Testing, Certification & Reporting

Commissioning

- ▶ Equipment & System Commissioning
- ▶ Playout, Ingest, Contribution & Distribution
- ▶ AV, Audio, Video & Specialty Integration
- ▶ Third-Party Integration
- ▶ Technical & User Acceptance Testing (FAT/SAT)

Customer Support

- ▶ Deep Technical Support
- ▶ On-site and Remote Support
- ▶ Customer-Specific Documentation & Resources
- ▶ Remote Diagnostics & Maintenance Plans
- ▶ Tailored Support Agreements

Training

- ▶ In-house Technical Trainers
- ▶ Custom-Tailored Training Programs
- ▶ Technical & Operational Team Training
- ▶ In-Person and Remote Delivery
- ▶ Training Guides, Manuals & Exercises

Professional Services

- ▶ Project Resources & Specialist Engineers
- ▶ Technology & Product Specialists
- ▶ Subject Matter Experts (SME)
- ▶ Turn-key Project Delivery
- ▶ PoC, Evaluation & Demo Equipment

Sales, Support & Distributor Capabilities

Your local Australian distributor for Evertz, Masterclock, G&D, TBC Consoles, VuWall, Brahma AI and more

Authorised Australian Distribution

- ▶ Local sales for Evertz, Masterclock, G&D, TBC, VuWall + more
- ▶ Same pricing as direct from manufacturer
- ▶ Broadcast, AV & IT Hardware / Software
- ▶ KVM, Video Wall & Master Clock Solutions
- ▶ Technical Furniture (Off-shelf & Custom)

Manufacturer Support

- ▶ RMAs, Warranty & Returns Processing
- ▶ Local Expertise with OEM Escalation
- ▶ Remote Diagnostics & Triage
- ▶ Critical Spares Strategy
- ▶ Direct Access to Manufacturer Engineering

Manufacturer Training

- ▶ OEM-Certified Product Training
- ▶ Manufacturer-Trained Instructors
- ▶ Product Manuals & Technical Documentation
- ▶ In-Person & Remote Delivery
- ▶ Train-the-Trainer & Certification Programs

In-House Manufacturing

- ▶ Equipment & Prototyping (Metal & Wood)
- ▶ Custom Cable Harnesses
- ▶ Control Room Consoles & Workstations
- ▶ Rack Integration & Monitor-Wall Infrastructure
- ▶ Modular Technical Furniture

Demo, Lab & Showroom Facilities

- ▶ Engineering Lab for Validation & Staging
- ▶ Integration Workshop (rack builds, patching, QA)
- ▶ Demonstration & Showroom Capability
- ▶ Customer Training & Walkthrough Spaces
- ▶ Pre-Configuration & Burn-In Facilities

Specialised Solutions

- ▶ Large Venue & Stadium AV Systems
- ▶ AI Technology Integration (Brahma AI)
- ▶ Live Production & Outside Broadcast
- ▶ Fan Engagement & Spectator Experience
- ▶ Custom Solutions for Complex Environments

Customer Deployments & Strategic Partners
