## About Slimline Warehouse

The display partner helping businesses create more visible and engaging spaces.

For over 25 years, Slimline Warehouse has helped businesses across Australia create more visible, engaging and functional customer environments through display, signage and visual communication solutions.

Combining commercial expertise, premium product solutions and responsive local support, Slimline Warehouse works closely with businesses to understand their space, customer environment and commercial objectives. Because every business communicates differently, the right display solution should support the way people move, engage and interact within a space.

From traditional signage, queue barriers and everyday display essentials through to cutting-edge digital display technology, large-format LED solutions and integrated commercial systems, Slimline Warehouse supplies display

solutions designed to support a wide range of industries and applications.

Backed by Australian stockholding, same day dispatch and dedicated customer support, Slimline Warehouse helps businesses access reliable display solutions designed to perform across modern commercial environments.

Contact our sales team today for expert advice on our standard or bespoke products, to discuss how we can assist your business, or to arrange a meeting.

# Outdoor LED Digital Displays

Weather-resistant displays designed for outdoor communication.

Extend communication beyond interior spaces with outdoor displays designed for reliable visibility across exposed environments. Built for transport hubs, shopping centres, hospitality precincts and public-facing spaces, Dline outdoor displays combine ultra-bright visuals, durable construction and reliable operation for messaging across changing conditions.

WIDE OPERATING TEMPERATURE

SUNLIGHT READABLE

High-brightness panels designed for visibility in direct outdoor lighting conditions.

REMOTE CMS CONTROL\*

Manage and update content remotely using Dline CMS powered by OptiSigns.

\*Optional CMS Integration

ANDROID OS & CONNECTIVITY

Built-in Android operating system with WiFi connectivity for simple content management.

WATERPROOF

Designed to withstand dust, rain and outdoor environments.

COMMERCIAL GRADE PANEL

Commercial-grade IPS panel with wide viewing angles and accurate colour reproduction.

BUILT TO PERFORM

Built for outdoor environments with durable construction and reliable commercial-grade performance.

## Key Features & Benefits

- Extend digital communication beyond indoor environments
- Deliver reliable visibility across streetscapes, entrances and public-facing spaces
- Weather-resistant construction supports operation in rain, heat and direct sunlight
- Available in wall-mounted, freestanding, battery-powered and solar-powered formats
- Support video, imagery, promotions and dynamic outdoor messaging
- Ultra-high brightness, IP-rated protection and commercial-grade reliability for outdoor operation

## Best suited to

- ✓ Transport & Public Spaces
- ✓ Hospitality & Entertainment
- ✓ Shopping Centres
- ✓ Stadiums & Venues
- ✓ Local Government

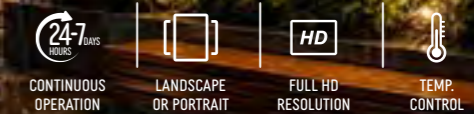

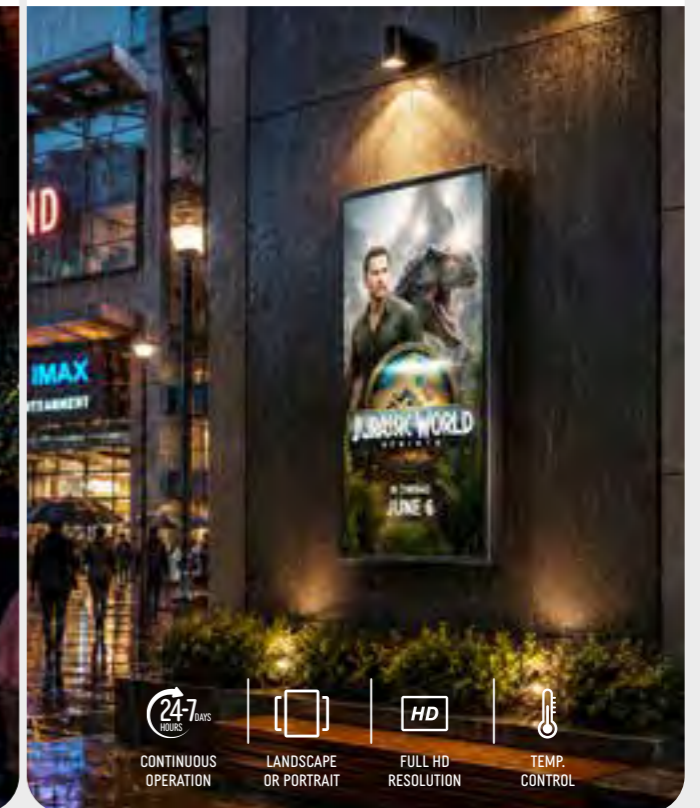

## Outdoor Wall Mounted Displays

Weatherproof ultra-bright LED displays for permanent outdoor installations.

## Ultra Thin Outdoor Displays

Slim-profile outdoor LED displays combining brightness with architectural design.

## Battery Powered Digital Poster

Portable battery-powered signage for outdoor promotions, events and public spaces.

## Solar Powered Digital Poster

Self-powered signage with integrated solar charging for extended outdoor operation.

# All-in-one LED Display.

## Your Ideas, Reimagined.

Cinema-grade LED displays that transform how you present. Wireless freedom. Integrated audio. Big, bold screens without the complexity.

Single, All-In-One LED displays up to 162 inches. Walk in with your phone. Cast wirelessly. Present instantly. Deep blacks that stay deep – even in bright boardrooms. Zero flicker for long sessions.

## What Makes It Different.

### Picture quality you can see immediately.

10,000:1 contrast with COB LED and EBL+ optical processing reduces glare by up to 50%. Blacks stay deep, colours stay true and content remains clear even in bright rooms.

**Present from anything, instantly.** Cast wirelessly from laptops, tablets or phones. Share content from up to nine devices at once. Prefer a wired connection? HDMI inputs available upon request.

**Comfortable for long sessions.** 3840 Hz flicker-free refresh with low blue light technology reduces eye strain. A wide viewing angle keeps visuals consistent across the room.

**Fully integrated by design.** Integrated full-range speakers with built-in amplification deliver clear sound without external hardware.

## Choose a size by room and audience.

| All in One LED model | Best for                                      | Closest viewer distance (guide) | Typical back row distance (guide) | Indicative audience (depends on layout) |
|----------------------|---|---------------------------------|-----------------------------------|---|
| DLTV108 (108")       | Small to medium meeting rooms, training rooms | 2m+                             | Up to ~6m                         | 10 to 20                                |
| DLTV135 (135")       | Medium rooms, larger training rooms           | 2.5m+                           | ~6m to 10m                        | 20 to 50                                |
| DLTV162 (162")       | Large rooms, halls, auditoriums               | 3m+                             | 10m+                              | 50 to 100                               |

Note: Viewing guidance is indicative. Final recommendation depends on room layout, content type, and the display configuration (pixel pitch).

THREE  
SIZES  
AVAILABLE.

# Indoor Modular LED Video Walls.

## Indoor LED Video Walls.

Seamless visuals. Zero bezels. Built your way. Modular panels that combine to create wall-sized displays.

Mix panel sizes freely, create flat walls, wrap corners, form curves, build columns. Wireless connection. 40mm slim. Lightweight die-cast aluminium.

- Pixel Pitch: P1.5 / P1.9 / P2.5 / P3.9 for ultra-fine detail.
- Contrast: 5000:1. Refresh:  $\geq 3840$ Hz flicker-free. Viewing: 155°.
- Installation: Wall mount, floor stack, ceiling hang with front or rear maintenance.

ROTATE 90°

LED SCREEN

WIRELESS

CUSTOM SIZES

## What Makes It Flexible.

- Mix Panel Sizes: Combine different dimensions to fit your exact space. No filler panels needed.
- Create Curves:  $\pm 5^\circ$  flexibility. Minimum 5.7m diameter for circular installations.
- Rotate 90°: Vertical or horizontal. Combine orientations for creative layouts.
- Smart Diagnostics: Built-in module monitoring tracks temperature, signal, working time, voltage.

## Indoor Wall Modular.

# Outdoor Modular LED Video Walls.

## Outdoor LED Video Walls.

Daylight visible. Weatherproof. Built to last. High brightness outdoor LED walls engineered for all weather conditions. Up to 6500 nits for full sun visibility. Custom dimensions with modular cabinets built to your specifications.

- Pixel Pitch: 2.5mm – 4.0mm matched to viewing distance.
- Operating Range:  $-20^\circ\text{C}$  to  $+50^\circ\text{C}$ . Signal: Cat5 up to 100m, fibre up to 10km.
- Installation: Permanent mounting to façades, freestanding structures, architectural installations.

## Choose Your Series.

**Gold Wire (DLGOD).** Up to 6500 nits. Higher durability for demanding outdoor environments. Premium solution for landmark installations and high-exposure sites.

**Copper Wire (DLCOD).** 5000-5500 nits. Cost-effective for standard outdoor use. Reliable performance at an accessible price point.

## What Slimline Delivers.

Site scoping and viewing distance advice  
System design (size, pixel pitch, mounting method). Supply of display, control equipment, and mounting. Installation and commissioning  
Content control platform setup and training  
Ongoing support and spare parts pathway.

## Outdoor Wall Modular.

# Mounts & Accessories

Flexible mounting solutions for modern display installations.

Complete digital display installations with mounting and positioning solutions designed for secure integration across commercial environments. Built for flexibility, stability and adaptable deployment, Dline mounting systems support wall-mounted displays, ceiling installations, freestanding configurations and multi-screen applications.

|   |   |  |  |  |
|---|---|--|--|--|
| <p><b>COMMERCIAL GRADE</b></p>  <p>Engineered mounting solutions designed for secure, flexible and professional installations across commercial environments.</p> | <p><b>EUROPEAN DESIGN</b></p>  <p>Precision-engineered for modern commercial environments.</p> | <p><b>PATENTED SYSTEM</b></p>  <p>Innovative mounting solutions designed for flexibility.</p> | <p><b>VESA COMPATIBLE</b></p>  <p>Supports a wide range of display sizes.</p> |   |

## Content Management System.

Ultimate remote content management & deployment

- 

**Flexible display design.** Supports a range of multimedia content, including audio, images, video, HTML, streaming, text and PDF.
- 

**Easy layout design, preview and monitoring.** Create layouts with ease. Preview, schedule and monitor performance to ensure your display looks right every time.
- 

**Add widgets for dynamic, self-updating information.** Add self-updating content from external sources by adding widgets, such as weather forecasts, data and time, RSS feeds and more.
- 

**User-friendly.** Schedule your displays and create interactive content with no coding or developer knowledge required.
- 

**Save time by scheduling.** Save yourself time with this hassle-free software, by scheduling your content to be shown whenever and wherever you need.
- 

**Scalable display solution.** Control multiple display screens using a single account. Add more units as your network grows.
