

Trusted partner. Trusted solutions.

Protecting people,
assets, and reputations
everywhere you operate

Organisations today operate in complex, always-on environments where safety, security, and operational continuity are critical. Convergent partners with customers across industries to design, deliver, and service integrated systems and offerings that help protect people, assets, and operations. We deliver consistent, resilient, and scalable solutions across the full system lifecycle.

Key benefits

Built for complex environments

Purpose-built expertise across mission-critical, regulated, and high-availability operations where uptime, accountability, and continuity matter most.

Integrated, open, future-ready solutions

Open, flexible systems and services that adapt as needs change, built for resilience today and performance over time, without locking you into a single vendor.

Global reach, local accountability

Standardised delivery models worldwide, backed by local teams empowered to respond quickly and operate close to the customer.

Addressing complex operational challenges

We partner with customers across the full system lifecycle to support secure operations today and adaptable infrastructure for the future.

Challenges

Increasing physical and digital risk across operations

Evolving regulatory, compliance, and risk requirements

Geographically dispersed and remote assets

Fragmented visibility across security and operations

Solutions

Integrated systems and services that unify physical security, life safety, and operational technologies to support proactive risk mitigation

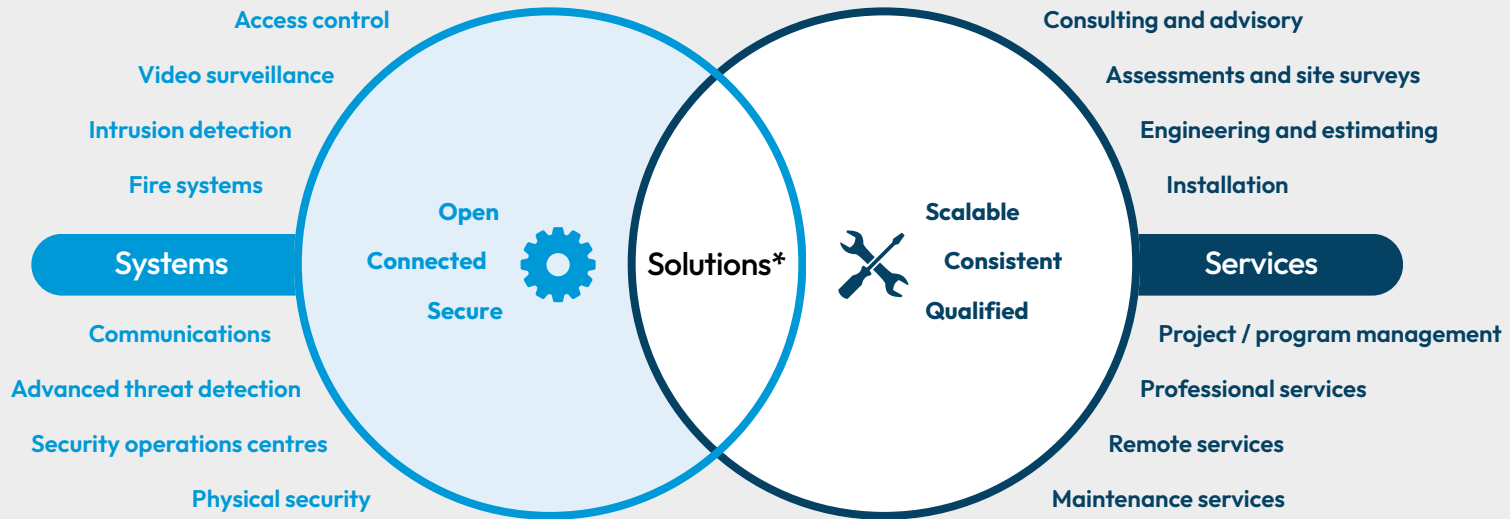

Solutions that enable audit readiness, resilience, and long-term performance across complex environments

Scalable, standardised solutions delivered consistently across sites, regions, and geographies

Open-architecture platforms that centralise monitoring, intelligence, and situational awareness

Real solutions. Real outcomes.

By bringing together systems and services, we deliver security and safety solutions that solve real world problems

Effective security and safety is a multi-layered approach involving people, processes, and technologies. Convergent-provided products and services are only one part of this multi-layered approach, will not detect or prevent all threats or solve every risk, and should not be your sole method of security or safety. **Please see the "IMPORTANT PRODUCT SAFETY AND SERVICE INFORMATION" documentation, available at convergent.com/terms, prior to using a Convergent-installed system**

A partner across the full solution lifecycle

Solution design

Strategy-led planning aligned to organisational risk, operations, and business objectives, ensuring solutions are purpose-built, resilient, and scalable.

Solution delivery

Seamless integration across legacy and modern platforms, delivered through standardised methods and local teams who understand your environment.

Service

Ongoing support, remote and onsite services, monitoring, and optimisation designed to maintain system performance, uptime, and resilience over time. We act as an extension of your team.

Why Convergent

- Purpose-built for mission-critical environments
- An open, flexible partner ecosystem
- One consistent experience, wherever you operate

- Highly trained, certified, and credentialed field teams
- Built to support complex, distributed operations
- A unified approach across design, delivery, and service

Supporting customers across data centres, education, enterprise, financial, public sector, and utilities environments.
