

ENTERPRISE SOLUTION TECHNOLOGY

Who We Are

ARC DATA is an Australian technology company delivering enterprise-grade connectivity, security, communications, and automation solutions.

We specialise in designing, supplying, and integrating scalable technology platforms for commercial, industrial, and multi-site environments.

CORE CAPABILITIES

Security & AI
Surveillance

Unified Communications
& VoIP

Enterprise Networking &
Connectivity

Cloud, Edge & Data
Solutions

Fibre & GPON
Infrastructure

Business Automation &
ERP

SOLUTIONS PORTFOLIO

End-to-End Enterprise Solutions

ARC DATA delivers integrated, enterprise-grade solutions that combine infrastructure, systems, and applications into a unified and manageable technology environment.

Our solutions are designed for performance, security, scalability, and long-term operational resilience.

ENTERPRISE NETWORKING & CONNECTIVITY

Wi-Fi, LAN, WAN & GPON Infrastructure

Capabilities

- Enterprise Wi-Fi architecture & deployment
- Fibre and GPON network design
- High-density and mission-critical environments
- Multi-site and campus networking

Enterprise Outcomes

- High-performance, scalable connectivity
- Centralised network management
- Reliable, future-ready infrastructure

Cambium Networks™
ConnectedPartner

SECURITY & AI SURVEILLANCE

Intelligent Video & Monitoring Solutions

Capabilities

- Enterprise CCTV system design
- AI-based analytics and detection
- Centralised monitoring platforms
- Large-scale and multi-site deployments

Distribution Leadership

- Jovision – Exclusive Distributor in Australia

Enterprise Outcomes

- Secure and compliant surveillance environments
- Intelligent insights for operations and safety
- Scalable deployment across multiple locations

JOVISION

GPON-BASED LOW-CURRENT INTEGRATION

Unified Infrastructure Over Fibre

Capabilities

- Delivery of low-current systems over GPON
- Unified infrastructure supporting:
 - CCTV & AI surveillance
 - Enterprise networking
 - Edge devices and systems
- Reduced cabling complexity

Enterprise Outcomes

- Lower infrastructure costs
- Simplified maintenance and expansion
- Fibre-based future readiness

DELIVERY & SUPPORT MODEL

How We Engage

Our Differentiators

- Australian-based with local expertise
- Enterprise-grade technology partnerships
- Integrated infrastructure and systems delivery
- Scalable, future-ready architectures
- Long-term partnership and support focus

Visit ARC DATA & Jovision – Live at ICC Sydney

Experience enterprise AI surveillance and infrastructure solutions in person.

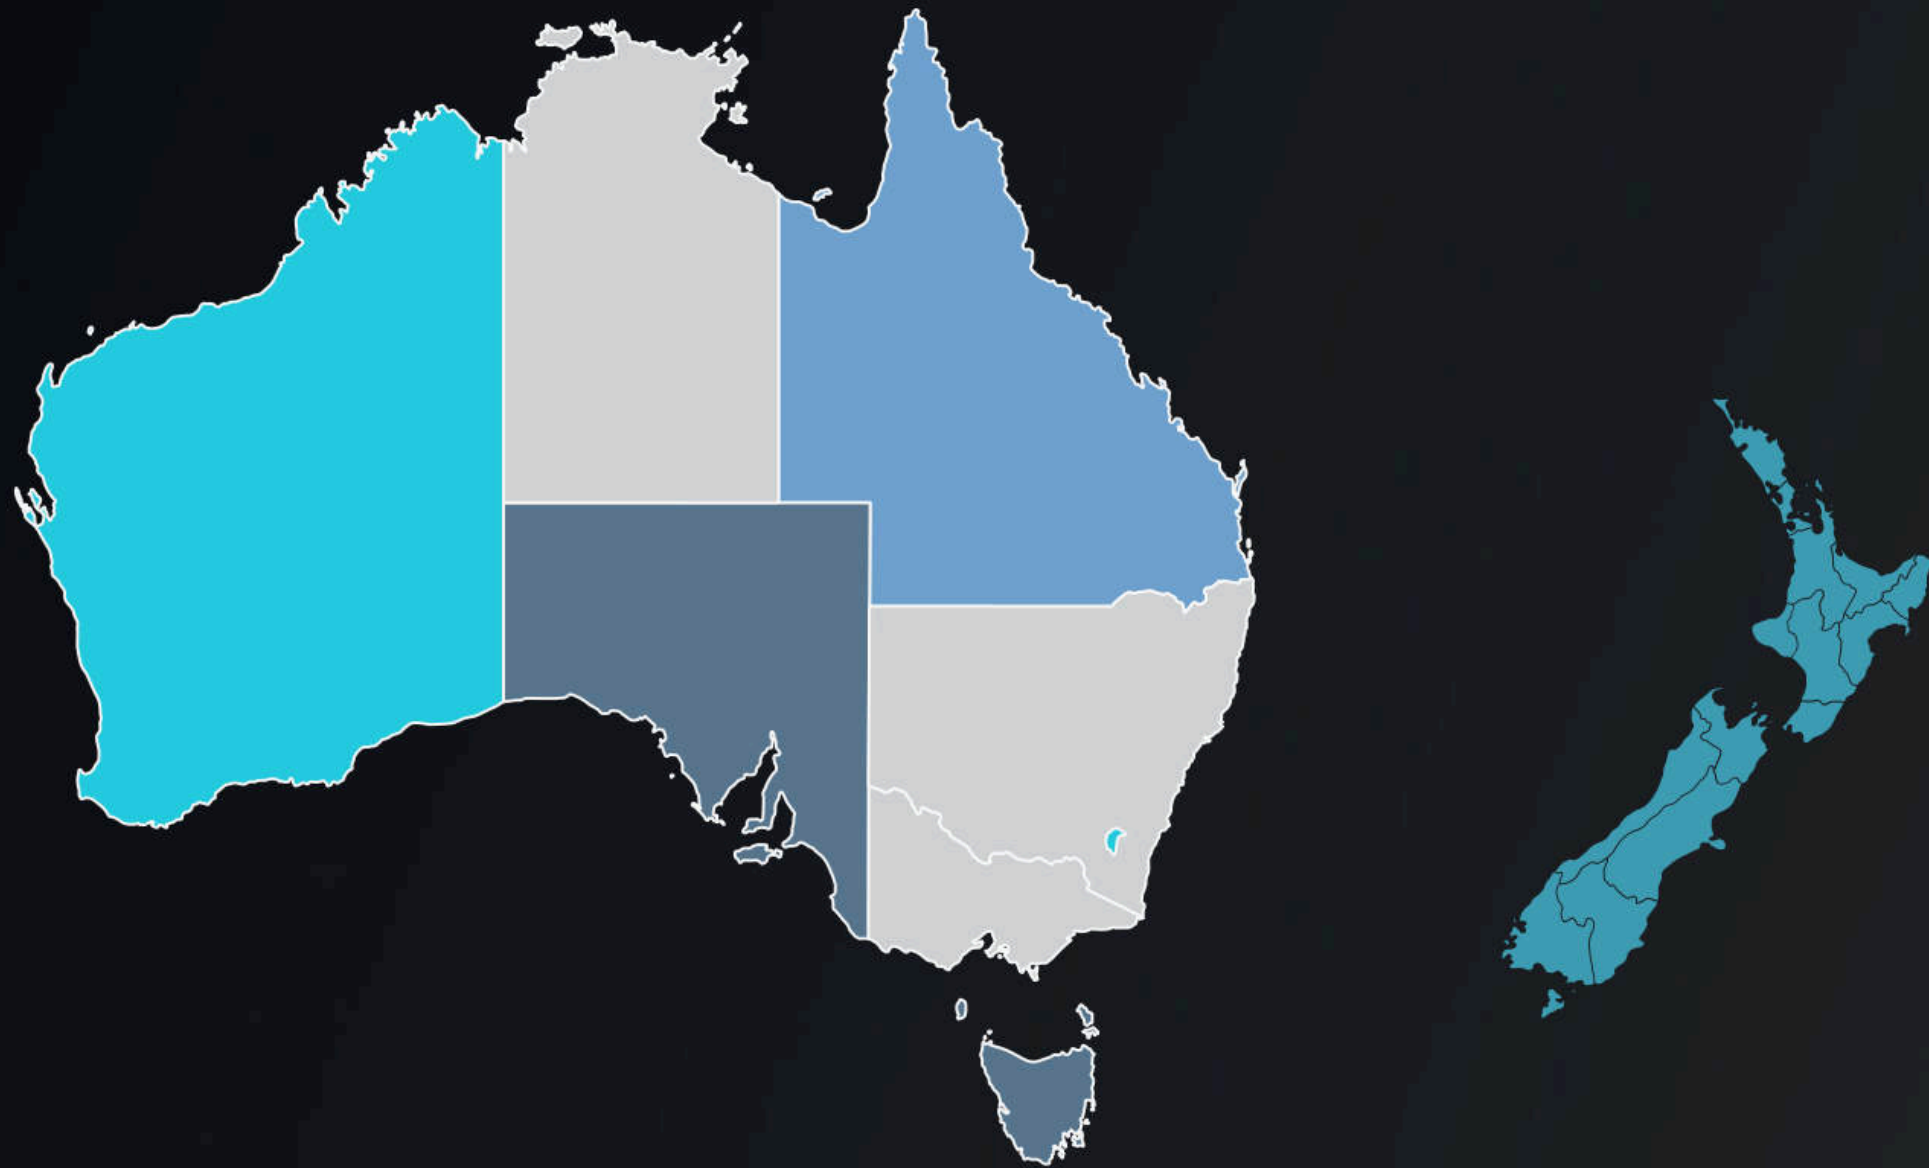

Security Exhibition & Conference 2026

- Dates: 2–4 September 2026
- Venue: ICC Sydney
- Stand: H50
- Exhibitors: ARC DATA × Jovision

What We're Showcasing

- Live ARC Vision AI demonstrations
- AI cameras, PTZs, and edge AI boxes
- Intelligent Servers & Cloud / On-Prem architectures
- Real-time safety, warehouse, and production scenarios
- End-to-end GPON, wireless, and enterprise network designs

SERVICE COVERAGE

Australia & New Zealand

ARC DATA delivers enterprise technology solutions across Australia and New Zealand, supporting multi-site, national, and cross-border deployments.

Service Coverage

- Nationwide coverage across Australia
- Active operations and support in New Zealand
- Remote and on-site delivery for enterprise clients
- Suitable for multi-location and distributed environments
