

CORPORATE PROFILE

For over 30 years, SWI has delivered secure infrastructure solutions in environments where failure carries consequence.

Our clients operate in complex, regulated settings. They require certainty in delivery, clarity in accountability and confidence in performance. SWI is structured to provide that assurance. We apply disciplined oversight, consistent standards and experienced leadership across every project.

Our commitment is straightforward — deliver properly, stand behind the work, and build enduring partnerships based on results.

Ben Sivewright
Managing Director

ABOUT US

SWI is a national security fencing and critical infrastructure solutions provider, delivering high-security perimeter systems across defence, justice, utilities, renewables, transport and data environments — sectors where compliance, asset protection and operational continuity are essential.

We align engineering, manufacturing and controlled site execution within a single accountable delivery model. This structure reduces interface risk, strengthens quality assurance and ensures continuity from concept through to long-term asset performance.

As a 100% Australian-owned organisation, SWI maintains national capability supported by regionally embedded teams. Consistent standards, technical expertise and disciplined systems underpin every project we deliver.

Thirty years of national growth.

One national standard. Applied without compromise.

● ● OUR
● ● STANDARDS

- Integrated delivery from manufacture to installation.
- Practical, solutions-focused execution.
- Close collaboration with clients and contractors.
- Continuous refinement through experience and innovation.

● ● OPERATING
● ● PRINCIPLES

- Safety and Compliance**
Safety and regulatory alignment underpin every stage of design, manufacture and installation.
- Quality Through Control**
Fabricated in Australia. Delivered to one national standard. Traceable, compliant and built to perform.
- Reliability and Accountability**
We take ownership of outcomes and communicate clearly at every stage.
- Local Knowledge. National Capability**
Regionally embedded teams supported by a unified national system.

● ● CORE
● ● VALUES

- Integrity
- Accountability
- Reliability
- Certainty

EXPERTISE

Expertise

In critical and high-risk environments,
there is no margin for fragmented delivery.

SWI maintains direct oversight across every stage
so that accountability never falls between the gaps.

01.	02.	03.	04.	05.
ENGINEERING DESIGN	MANUFACTURE SUPPLY	PROJECT DELIVERY	COMPLIANCE ASSURANCE	LIFECYCLE SUPPORT
Technical design, constructability review and compliance alignment for high-risk environments.	Trusted Australian manufacturing capability and certified national partners ensuring quality, availability and traceability.	Coordinated national teams installing secure systems with controlled methodology and disciplined execution.	Verified, documented, and audit-ready systems aligned to SoCI and Australian Standards.	Ongoing maintenance and lifecycle support for high-risk and critical assets.

Our people

Stronger together. Built to perform.

SWI's capability is delivered by experienced engineers, project managers and specialist installation teams operating across Australia. Every role is supported by the appropriate qualifications, clearances and technical oversight.

Technical leadership is embedded throughout the project lifecycle, from early planning and constructability review through to commissioning and long-term asset performance. Directors and senior management maintain active involvement to ensure continuity, accountability and quality of execution.

Regional expertise is reinforced by consistent national systems — combining local insight with disciplined governance.

National presence

Manufacturing facilities, project teams and leadership are embedded nationally to support complex, multi-site delivery.

SAFETY

Financial performance at SWI is defined by consistency.

Revenue is diversified across seven sectors, supported by long-term partnerships in critical infrastructure and government environments.

This stable foundation, combined with national manufacturing and integrated project delivery, enables the controlled execution of large-scale, high-security projects across Australia.
