IP-Speaker**

4 R&D Centers in China + Vietnam Facility

Cloud-Powered & Customized

20,000 m² China +
4,000 m² Vietnam

Experience in Helping Global Brands Set up Their Own Manufacturing Bases

The diagram illustrates a comprehensive smart city network architecture. At the top, various devices are connected to a central network: 4G/Solar (wireless camera), Veye Pro (smartphone), Cloud Web (laptop), a multi-camera system, a Decoder, Keyboard, and VMS (laptop). These connect to a Cloud Server and a Gathering Switch. The Cloud Server is linked to a Router and a 4G antenna. The Gathering Switch connects to a POE Switch. Below the POE Switch, a network of switches (VVR, POE NVR, NVR) and various cameras (IoT, UVC, IP Camera) are shown. The bottom row features logos for smart Dual Light, FUJICOLOR WDR, Thermal ColorView 3.0 Active Deterrence, TandemView Panoview Active Deterrence, IP Speaker, and Video Intercom.
