

Simplify workforce management across every security site

You don't need more disconnected systems, spreadsheets, or manual follow-ups.

Xemplo gives security providers a single connected platform to hire, onboard, manage compliance, capture timesheets, and prepare payroll-ready data across sites, and events.

Built for the reality of security teams

Hire and manage candidates

Post jobs, track applications, and move successful candidates straight into onboarding with Xemplo Hire. No re-keying the same worker details across multiple systems.

Deploy your workers faster

Get workers ready before their first shift with digital onboarding. Capture personal details, licences, work rights, bank, tax, and super information. Then deliver policies and induction training online.

Track licences and compliance

Keep security licences, credentials, training records, and documents organised against each worker profile – with automated alerts when something is missing, expiring, or requires attention.

Manage time and attendance

Capture hours worked, leave, and approvals in one place. From mobile timesheets to manager approvals and payroll-ready data, Xemplo makes it easier to manage time and attendance across multiple sites.

Improve visibility across sites

Centralise worker information, approvals, and key employment details – giving managers and operations teams clearer visibility across workforce compliance.

Connect to payroll

Send submitted onboarding, timesheet, and payroll-ready data into your preferred payroll system – reducing duplicate data entry, improving accuracy, and offering teams better visibility.

One platform.
Less manual work.
More control.

For security providers, workforce management doesn't stop at onboarding.

Xemplo connects the processes that often sit across separate systems – from hiring and worker compliance to timesheets, payroll preparation, and workforce records.

56%

reduction in HR
and payroll admin

8.5hrs

saved per week
on manual tasks

100%

paper-free
operations

Based on customer-reported outcomes.

Ready to reduce workforce
admin with Xemplo?

Manage onboarding, compliance, time and attendance, payroll workflows, and workforce records with a connected platform.
