

Meat Industry Capability

WILEY

Meat Industry Capability

Wiley is a global partner in meat processing, slaughtering, cutting, engineering, and distribution solutions across the beef, pork, poultry, seafood and animal goods markets.

With deep industry expertise, we optimize processing operations for improved hygiene and food safety, cost efficiency, and process automation. From leading systems challenges to 3D and digital fabrication, our skill, flexibility and quality. Leaders in process design, automation, and value added production, we help our clients navigate the non-linear and sector meat processing, driving maximum success.

Since 1981

INTEGRATED DESIGN - ENGINEERING - CONSTRUCTION

Food Industry Capability

WILEY

Food Industry Capability

Wiley is a global partner for food manufacturers looking for digital solutions across a wide range of food streams in a diverse and dynamic product category. Safety and efficiency are critical, we understand the complexity behind every process.

We work diligently to help you create a solution that meets your needs for food safety and greatest customer service. We help you improve processing, automation and construction practices that enhance performance and support long term growth. With deep industry capabilities, we help you navigate complex regulatory processes in order to changing market demands and deliver high-quality, turn-key facilities.

Co-products, By-products and Synergies Capability

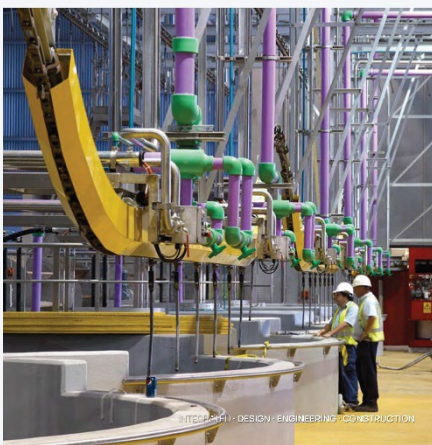

WILEY

Co-products, by-products and synergies capability

Wiley partners with food manufacturers to unlock the full value of by-products and co-products, turning waste streams into products, thereby generating assets. Through integrated design, engineering, construction, and operation, we help you realize recovery through generation and improve sustainability performance.

Our specialized team works together to create a new revenue stream, energy systems and industrial services. We ensure compliance and maximize efficiency while meeting all regulatory requirements. We help you optimize your complex operations, maximize value, reduce waste, lower operating costs and build more sustainable, closer operations for the future.

Since 2018

Cold Chain Solutions Capability

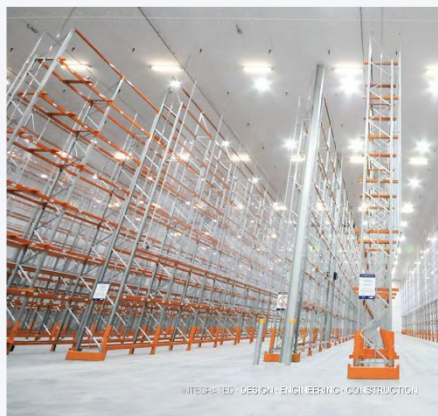

WILEY

Cold Chain Solutions Capability

Wiley works with global cold chain solutions to build product integrity from harvesting through to storage and distribution. In this complex environment, safety, control, efficiency and speed are critical, we design, construct facilities that maintain quality, reduce complexity and support seamless operations across the supply chain.

Whether, air-cooled, water-cooled, and refrigeration systems, we provide the design, construction, and feasibility engineering through operation and maintenance. Our capabilities across global markets provide advanced knowledge and capabilities to create facilities that perform consistently, our strong standards that reduce complexity, improve efficiency and support the growing demands of the food industry.
