

# Embedding the highest standards of social performance within the food sector

Instilling human rights practices in food production and supply chain operations

**Internal and supplier audit solutions**

## Inspiring trust through best practice

The responsibility for businesses to respect and uphold social and supplier performance standards has never been greater — particularly in the food sector, where brand reputation, product safety, and consumer health are directly impacted by ethical sourcing and operational transparency.

When food producers, processors, and manufacturers prioritize human rights and responsible practices, they build stronger relationships — not only with their own workforce and supply chain partners, but also with regulators, communities, and increasingly conscious consumers. This is not just a moral imperative — it's a critical business differentiator.

By embedding responsible sourcing, labour rights, and food safety principles into your operations — from farm to fork — your organization can better align with growing consumer expectations and help lead the way toward a more secure and sustainable food system.

To meet these expectations, forward-thinking food businesses are conducting internal and supplier audits to evaluate, assess, and improve practices — from agricultural production and factory floors to processing, packaging, and distribution.

## Navigating today's supplier and human rights landscape

Every part of an organization — from sourcing and production to logistics and retail — plays a role in upholding responsible and ethical business practices. In the food sector, where supply chains are often complex and geographically dispersed, even a single lapse can trigger scrutiny from customers, regulators and the media.

With the right processes and supplier audit practices in place, businesses can reduce legal exposure, safeguard brand reputation, and protect the welfare of workers throughout their value chain. This proactive approach empowers teams, strengthens supplier relationships, and creates a more resilient and sustainable future.

**160 million**

children (nearly one in ten worldwide) are engaged in labour considered harmful to their health and development, including in food production, garment mills and packaging factories.<sup>1</sup>

**\$236 billion**

Forced labour generates \$236 billion in illegal profits annually, highlighting the urgent need for greater vigilance across food supply chains.<sup>2</sup>

**45.8 million**

There are 45.8 million modern slaves in operation today including 60% in supply chains.

**77%**

of nations excluded workers from establishing or joining trade unions in 2023.

1. <https://www.ilo.org/topics-and-sectors/child-labour?>

2. <https://www.weforum.org/stories/2025/01/state-of-modern-slavery-is-worse-than-you-thought/>

# The increasing responsibility for businesses is driven by two key forces:

## 1. Rising consumer expectations

Today's consumers are more informed and socially conscious than ever. Whether deciding what food ends up on their plate or which brands to trust, they expect producers, manufacturers, and retailers to demonstrate ethical sourcing, fair treatment of workers, and transparent supply chains. This is especially critical in the food sector — where a single issue, such as allergen mismanagement or a safety breach, can lead to severe consequences for both public health and brand reputation. Meeting these expectations not only protects your business — it builds lasting loyalty in a highly competitive industry.

## 2. Expanding legal and regulatory frameworks

Globally, there is growing pressure on food businesses to ensure safe working conditions, uphold human rights, and manage environmental and operational risks across the supply chain. Food safety laws, allergen labelling requirements, and regulations such as the UK Modern Slavery Act and the EU Corporate Sustainability Due Diligence Directive are raising the bar for compliance.

These evolving frameworks — alongside global benchmarks like the United Nations Sustainable Development Goals (UNSDGs) — are pushing organizations to take a proactive, transparent approach to supplier and food safety performance.

# How audits can empower organizations to achieve the highest standards

**"Approximately 600 million people worldwide—nearly 1 in 10—fall ill each year due to contaminated food, leading to 420,000 deaths annually."**

In the food sector — from primary production to processing and distribution — the stakes for ethical sourcing, supply chain resilience, and regulatory compliance are higher than ever. With increasingly complex global supply chains and rising scrutiny from regulators and consumers, food businesses must demonstrate that their practices meet the highest safety, quality, and ethical standards.

To address these challenges, many leading food producers and manufacturers are implementing human rights and supplier performance policies, conducting targeted audits across their supply networks, and working with trusted partners like BSI to strengthen operational integrity and build long-term trust. We understand how supplier practices directly impact everything from allergen control and hygiene standards to product recalls, public health, and market access.

Through our internal and supplier audit programmes, we help food sector organizations move beyond compliance — enabling them to lead with confidence, meet regulatory and customer expectations, and drive measurable, positive change across their operations.

# Drive positive change with our audit programmes

In the food sector — where product safety, quality control, and supply chain transparency are under constant scrutiny — a robust audit programme is essential to meet and exceed your human rights, safety, and sustainability objectives.

As your trusted partner, BSI delivers tailored audit solutions that support every part of your food operation — from internal processing sites to complex, multi-tiered supplier networks. Whether you're aiming to reduce the risk of product recalls, strengthen responsible sourcing in agricultural supply chains, or prepare for evolving food safety regulations, our programmes are designed to help you move confidently from insight to action.

Using our digitally enabled tools and the deep sector experience of our global auditing teams, we help you:

- Identify risk hotspots and compliance gaps
- Pinpoint recurring issues that impact performance and reputation
- Make informed, strategic decisions that strengthen resilience and trust

## Internal audit programmes

Elevate your brand's transparency with a risk based and independent review of your organizations' ethical and social practices.

## Supplier audit programmes

Enhance traceability and minimize risks from third-party practices with a supplier audit.

Whether leveraged internally or across your value chain, these assurance solutions evaluate, measure, understand and report on your organization's social and ethical performance.

## Our capabilities

We create risk-based assurance programmes catered to areas requiring your greatest focus, and we also have a wealth of experience delivering already established Industry Association and certifiable programmes.

As part of our commitment to address human rights and abolish Modern Slavery, our internationally recognized standard (BS 25700) is available to all organizations on an open access basis.

## Industry programmes

Each of the associations listed below plays a critical role in establishing best practices for supply chains in corporate social responsibility. Using these industry programmes developed by groups of brands with a common purpose, we can provide visibility and transparency across your supply chain. Some of the industry programmes we deliver:

# How our audit programmes can help you

With a tailored audit programme in place, you can inspire trust both within your organization and across your food value chain — no matter its complexity or size. Our expert team helps you gather meaningful insights throughout the auditing process, enabling you to drive improvements in safety, quality, and ethical practice across your operations.

**Our expert team can help you gather meaningful insights throughout the auditing process**

**1**

## **We align with your commercial and compliance goals**

We begin by understanding your strategic priorities — whether that's reducing the risk of product recalls, strengthening allergen control, or meeting rigorous food safety requirements — while factoring in your unique risk profile across production and supply.

**2**

## **We define food-sector best practice**

We establish audit tools, criteria, and deliverables aligned to your operations, drawing from global food safety standards such as GFSI-recognized schemes, SMETA, and local regulatory frameworks to ensure relevance and rigour across all touchpoints.

**3**

## **We collect and benchmark actionable data**

We gather performance data from your production facilities and supply chain, measuring against key indicators in food safety, hygiene, environmental monitoring, and quality management to uncover non-conformities and improvement areas.

**4**

## **We deliver insight across your global footprint**

We provide tailored, risk-based, and continuous insight across multiple sites, facilities, and geographies — supported by auditors with deep expertise in the food sector and an understanding of regional practices, regulations, and culture.

### **Data-driven insights**

Our BSI Connect Screen platform infuses geographic risk data and analysis into the assessment process to provide a risk-based view of the supply chain. The enhanced visibility empowers organizations to protect brand reputation and ensure a resilient supply chain through data-driven insight.

# Auditing programmes for human rights: Empowering people, powering business

The benefits of adopting our social audit programmes are wide-ranging — from personal to practical, ethical to economic. In the food sector, where global supply chains are labour-intensive and highly regulated, audits provide critical visibility and help reinforce trust in the systems that keep people safe and products compliant. As your trusted partner, we will help you to:

## **Build supply chain transparency**

Gain visibility across complex food supply chains — from agricultural sourcing and ingredient processing to packaging, transport, and third-party production facilities. Our audits help uncover risks such as unsafe working conditions, unethical labour practices, or poor recordkeeping that may threaten both compliance and consumer trust.

## **Create actionable steps to address and rectify deficiencies**

By identifying recurring risks — including allergen mismanagement, hygiene breaches, excessive overtime, or lapses in quality assurance — you can implement targeted improvements that reduce the likelihood of non-conformities, costly recalls, or reputational damage.

## **Revisit and strengthen internal policies and processes**

Our independent audits can surface vulnerabilities in your food safety protocols, workplace conditions, or supplier engagement practices. These insights support stronger governance, reinforce food safety culture, and help your teams align with leading regulatory and ethical standards.

## **Ensure compliance and demonstrate accountability**

Prove your commitment to ethical and sustainable practices through documented audit trails and continual improvement. Meet the expectations of customers, certification bodies, and regulators — whether through GFSI-recognized schemes, SMETA, or local human rights legislation — and enhance your credibility with stakeholders at every level of the value chain.

**By thoroughly examining supplier operations, you can pinpoint areas where social and human rights risks may be present**

# Drive social change with your partner in progress

## Catalyst for positive change

By assessing and certifying against recognized standards, regulations, and industry best practices — including food safety, responsible sourcing, and ethical labour — we act as a catalyst for meaningful change. Our audit programmes help food businesses foster safer working environments, improve supplier practices, and strengthen transparency across the entire supply chain — from farms and factories to packaging and logistics.

## Deep sector and auditing expertise

Our people bring extensive knowledge and insight from delivering thousands of audits across food production, processing, packaging, and global agricultural supply chains. Their food-sector expertise ensures that our audits are not only thorough but also practical, sector-relevant, and responsive to the complex realities of food safety, compliance, and ethical performance.

## People-first processes, powered by innovation

We combine deep industry expertise with smart digital tools to deliver agile, scalable audit solutions. Our Hybrid Audit programme blends on-site and remote assessments with integrated planning and real-time reporting — supporting seamless delivery, minimizing operational disruption, and enabling meaningful engagement with workers, while helping you reduce environmental impact.

## Over a century of experience

For more than 120 years, we've supported organizations in meeting their goals and shaping a fairer, safer food system — helping balance the commercial need for efficiency with rising expectations for ethics, sustainability, and public health.

## Incorporated by Royal Charter

As a purpose-led organization, we reinvest our profits to drive progress, build trust, and raise standards across industries — enabling businesses, regulators, and consumers to thrive together in a safer, more sustainable food supply chain.

## Vast human rights expertise

Our people have expertise in vast areas of the social landscape, including:

- Business legitimacy & integrity of records
- Underage labour
- Discrimination & disciplinary practices
- Forced labour
- Working hours & overtime
- Freedom of association & effective recognition of the right to collective bargaining
- Harassment and abuse practices
- Wages & benefits
- Terms of employment subcontracting
- Occupational health & safety

# Join us in promoting humane, equitable working conditions

Today's business landscape may have its challenges, but it also represents a huge opportunity - the opportunity to create a flourishing, rewarding and socially equitable world. By improving the human rights practices of not only your immediate organization but the suppliers and third-party networks you depend upon too, you can play a vital role in ensuring a more sustainable society. And, as you do so, we can be your partners in progress.

# BSI Training Academy Australia

Training Schedule  
Jan to Jun 2026

## Highlights

### Artificial Intelligence (AI) Training

Build a robust foundation to effectively use, develop, communicate, or promote AI solutions with our training courses and qualifications.

[View Courses](#)

### Training Catalogue

BSI Training Academy's comprehensive guide to training courses and qualifications, designed to support your professional growth.

[View Catalogue](#)

### Lead GHG Verifier and Validator Training Course

New released training equips you to meet the growing demand for trusted GHG verification and validation.

[View Course](#)

Let us guide you through BSI's courses and qualifications training journey.

# About BSI Training Academy

Forward-thinking organizations are recognizing that to stay ahead of industry change, to win the talent war and to outperform the competition, they need to instill a culture of continuous learning and constant growth within their organizations.

Standing still is not an option. BSI Training Academy is key to this, supporting people and organizations to develop and progress toward a resilient future.

We are one of the largest training and certification bodies, we have helped shape many of the world's leading standards from ISO 9001 to ISO/IEC 27001.

We take the time to understand your company's learning needs to develop training solutions that satisfy your business objectives and your personal aspirations.

**Our approach** - accelerated learning via participation in activity-based learning and sharing with peers.

**Expert tutors in their field** - offering a world-class learning experience that our delegates rate as first class. They know best how to transform your organization by turning our experience into your expertise.

**Internationally recognized BSI certificates** - a BSI Training Academy certificate is a mark of expertise, quality and integrity.

**BSI Blockchain-based solutions** - enables you to showcase your achievements with just on click through a single trusted platform, powered by the OriginTrail Decentralized Knowledge Graph and underlying blockchains. [Watch demo](#)

# BSI Personal Qualifications

By successfully completing a combination of courses and assessments, you'll earn a BSI qualification and the right to use a BSI Mark of Trust.

The BSI 'Professional' badge is used by individuals who have passed a BSI training course successfully. The badge provides a strong and credible endorsement that can be displayed in a person's CV, LinkedIn profile, email signature or any similar information. In addition to highlighting a person's professional competence, it also provides confidence and helps you stand out.

## Auditor Qualifications

Internal Auditor and lead auditor pathway, with three stages (practitioner, professional and certified professional)

- ISO 9001 auditor qualifications
- ISO 13485 auditor qualifications
- ISO 14001 auditor qualifications
- ISO 45001 auditor qualification
- ISO/IEC 27001 auditor qualifications
- ISO/IEC 42001 auditor qualifications

## Greenhouse Gas Qualifications

Two stages (practitioner and professional)

## Food Safety Foundation Qualification

Foundation stage

## AI Management Practitioner Qualification

Course dates may subject to changes due to unforeseen circumstances. Do contact us prior to enrolment.
