

Smart automation solutions that transform industries

## Meat Processing

### *Global leaders in meat processing solutions*

Scott sets the benchmark for automation technology in the global meat processing industry and has established itself as a world leader in commercialising innovative solutions.

We are the global market leader in lamb boning solutions, with systems delivering increased returns, achieved by measuring critical carcass dimensions utilising X-Ray technology, guiding critical cuts and delivering product of the highest quality. After the success seen by our lamb processing systems in Australasia, we intend to replicate this throughout the world, as well as further develop our beef, pork and poultry automation technology.

### *Featured Products*

 **BLADESTOP**

*With the fastest stopping time in the market, the BladeStop bandsaw reduces the risk of serious injury and makes jobs safer for meat processing operators across the globe.*

## Mining

### *Crushing it since 1969, World leading Sample preparation.*

With over 50 years' mining experience, Scott is recognised as a world leader in automated solutions, sample preparation and certified reference materials.

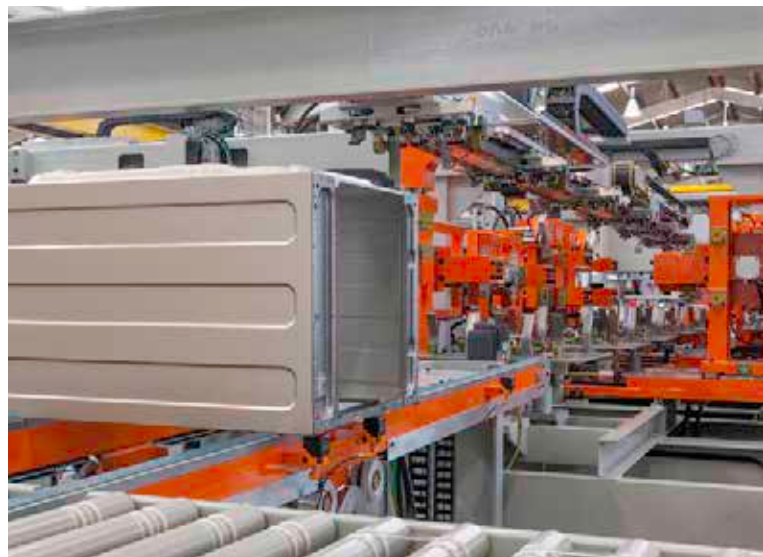

We leverage our extensive automation expertise to bring new technologies to the mining sector that maximise safety, productivity, and quality. These customised solutions include automated robotic refuelling, automated sample preparation systems, and advanced sensing and sorting systems. In recent years there has been a significant increase in the development of end-to-end automated laboratory solutions. We collaborate closely with our clients on a project basis to help achieve their specific objectives.

*Our Rocklabs equipment has been supplied to mines, laboratories and research institutions in over 100 countries. Rocklabs specialised equipment, crushers, pulverisers and sample dividers, are extensively used in laboratory testing and analysis across many commodities including iron ore, gold and other precious metals, base metals, energy minerals and construction materials.*

## Materials Handling & Logistics

### *Complete end-to-end logistics solutions*

Scott are experts in automated and robotic systems for internal logistics of secondary packaging such as trays, cartons, crates and pallets.

Our wide portfolio of materials handling and logistics include layer and robot palletisers, pallet conveyors, case conveyors, order preparation systems, pick and pack, and storage and retrieval systems. In addition, we offer our flagship Maestro+ software package designed to provide better, real-time overviews, reduce operator's handling time, as well as improving product turnaround.

We have provided materials handling solutions for some of the world's largest manufacturers across Europe, North America and Australasia.

## Appliance Automation

### *Automated appliance manufacturing and assembly*

Scott design, build and implement automated manufacturing and assembly systems for the world's leading appliance manufacturers. Our solutions range from fully automated production lines to standalone units designed to meet the flexibility required by lean manufacturing processes.

Our systems allow for multiple model variants through automatic or manual changeover and can process materials including coated and uncoated steel, stainless steel and aluminium.

Engineering excellence applied during the manufacturing process ensure that all equipment is installed to the very highest quality and exceed the required standards for CE and EAC certification where applicable.

*Our PAL 4.0 is the latest addition to our range of palletisers. It's compact footprint and high level infeed maximise valuable production space. Designed for high capacity throughput the Scott Pal 4.0 palletiser is capable of single or multi-line operation and suitable for a wide range of products.*

### *Global service and support team*

*Scott has a dedicated international team that provides servicing, upgrades, preventative maintenance and breakdown support throughout the world, fully supported by engineers in our global offices.*

*With many years of experience, our engineering expertise is founded in design and manufacturing in automation and robotics; partnered with an attitude and drive for excellence in engineering and service.*

*Our Service team is able to perform preventative maintenance, curative maintenance, remote diagnostics and training while also supplying spare parts and upgrades to keep our customers equipment running as efficiently and productively as possible.*

*Transbotics AGV solutions offer the latest technology to achieve optimal operating efficiencies. With state-of-the-art fast charging technology, superior navigation and positioning, our range of solutions can tackle the most challenging application requirements.*

**TRANSBOTICS**

## Globally Focused and Locally Strong

***With design and build operations across Australasia, China, Europe and America, and over 100 years of engineering excellence, Scott are the global experts in automation. The combination of a global focus and local strength enables us to deliver exceptional service to our customers wherever they may be in the world.***

Scott delivers smart automation and robotic solutions that transform industries by making businesses safer, more productive, and more efficient. Our diverse capability makes us the first choice for hundreds of the world's leading brands.

We are proud to be developing better ways to do things in sectors as diverse as manufacturing, mining, meat processing, materials handling and industrial automation. Our solutions redefine end-to-end automation, covering everything from automated materials handling to vision-guided robotic processing and palletisation right through to automated guided vehicle warehousing.

In 2021 Scott committed to leading a sustainable future. We recognise that our collective responsibility extends beyond commercial outcomes, and it includes our relationship with people, and the environment.

### Safety and Wellbeing Commitment

***At Scott, people are at the core of our business. We are committed to creating a culture where safety and wellbeing is paramount in everything we do. We encourage a positive work environment that is free from harm, where our people thrive, feel cared for, and look after each other.***

To ensure our people, and yours, remain safe and well, we have well-established safety and wellbeing management systems and processes. With dedicated safety coordinators, in-house certified trainers, and first aiders, our team is fully supported and well informed with the legislation and law changes globally to ensure our team is safe to operate in all our workshops and on customer sites.
