

Sanikleen Group Australia

Your Specialist Industrial Hygiene Partner

ABOUT

With over 25 years of operational experience, SGA is a leading industry expert.

Dedicated to leveraging specialised expertise and R&D to drive continuous industry advancements.

We uphold integrity by employing and training staff, paying award rates, and providing development opportunities.

Safeguarding a substantial portion of Australia's food supply for export, protecting billions in product value.

SGA is proudly 100% Australian owned and operated.

MISSION

SGA delivers consistent, standards driven cleaning to the food and beverage industry, continually improving how we protect people, products, and processes.

SGA invests in technology that reduces risk and delivers faster, more effective results for our partners.

Drone Cleaning

Drone technology eliminates the need for scaffolding, EWPs, and rope access for working at heights tasks.

Deployed across solar panels, facades, and hard to reach surfaces.

- ✓ Reduced working at heights risk
- ✓ Faster deployment than traditional methods
- ✓ Solar panels and building facades

Laser Cleaning

Precision laser cleaning for environments where traditional methods fall short. Chemical free, precise, and effective for restoring surfaces to production ready condition.

- ✓ Heavy biofilm removal
- ✓ Rust and corrosion removal
- ✓ Stainless steel touch ups

COMPLIANCE

SGA proudly stands as the only service provider in the Food & Beverage industry to hold four ISO certifications directly due to the strength of our certified management systems.

ISO 9001

Environment

TRAINING

All SGA team members complete a full course bespoke to each site's hygiene tasks, ensuring new staff work at their best ability with clear instructions for efficient, routine results.

Bespoke Videos

Our bespoke training videos provide clear, visual guides on cleaning procedures, safety protocols, and complex machinery operations, ensuring a practical, hands on approach for better understanding.

Cleaning Procedures

Our Cleaning Standard Procedures (CSPs) provide step by step instructions tailored to specific equipment processes, helping to meet regulatory standards and exceed audit expectations.

Competency Assessments

Each module is paired with a comprehensive test to ensure material absorption and confident application. Designed to reflect real work environments, these assessments empower employees to apply their skills on the job.

We've built our success on strong partnerships, not just contracts.

- ✓ Site Visit & Scoping
- ✓ Proposal Delivery
- ✓ Implementation Plan
- ✓ Launch SGA Framework

Let's partner to raise the standard of hygiene across your facility.
