Where Quality Flows

Industry leading products and service brought to you by Ausquip Industrial Hose.

Since our inception nearly 30 years ago, our business has seen many changes, however, one constant has been the commitment we make to our customers to bring the best possible products and service we can to them.

We do this by constantly looking for ways to improve what we do, and looking for new ways how to make life simple for our customers to purchase and use our products.

Our values of Commitment, Honesty and Accountability are designed to push us to ensure we show up everyday to do the best job we can for our customers and for each other. We will do whatever needs to be done as work towards our mission of being a leader in our chosen industries, and putting our customers needs at the heart to what we do.

Key to helping us achieve our goals not only our relationships with our customers but also our manufacturers. We source products from numerous parts of the world, however we have a strong focus on harnessing the quality, expertise, and hose manufacturing superiority from our Italian partners. IVG Colbachini and I.P.L. are global leaders in rubber and PVC hose manufacturing respectively, and we are proud to bring a selection of their products to you.

As an authorized distributor for these manufacturers, Ausquip Industrial Hose provides direct access to world-class products along with their unmatched technical expertise. Our partnership with them ensures you receive genuine IVG and IPL products backed by local support and specialized knowledge of Australian industry requirements

Our Manufacturers

Over 60 Years of Industrial Hose Innovation

Global Leaders in Premium Rubber Hose Manufacture

Founded in 1966 in northern Italy, IVG Colbachini has grown from a local hose manufacturer into a global leader in industrial rubber hose production. With over 40,000 sqm of state-of-the-art manufacturing space and exports to more than 90 countries, IVG continues to set the benchmark for quality and performance.

IVG hoses are trusted by breweries, distilleries, and beverage manufacturers who require uncompromising quality. Whether you're managing small-batch craft or global-scale production, IVG delivers performance you can rely on.

Key Features

Advanced Rubber Compounding

Proprietary formulas tailored for food, beverage, and industrial use.

Rigorous Quality Testing

Every batch exceeds global industry standards.

Certified Manufacturing

ISO 9001:2015 + sector-specific certifications.

Full Traceability

End-to-end production history from raw material to finished hose.

Customized Solutions

Our IVG hose selection is available in various diameters, and depending on volume can be customized to suit your specific needs, from hose cover colors, specific working pressures, or unique hose design. The Ausquip team can recommend the ideal IVG rubber hose based on what's most important to you.

Engineered in Italy. Trusted Worldwide. A legacy of Excellence

For decades, I.P.L has been at the forefront of PVC hose technology, creating innovative solutions that meet the rigorous demands of food and beverage processing. All manufacturing continues to be carried out from their headquarters in Northern Italy ensuring consistent quality and reliability in every meter of hose.

Its our aim to stock many of the most commonly used sizes and products used in a variety of applications, however if we can also bring to you those sizes that are not commonly stocked if and when required.

Perfect for a Diverse Range Applications

Light-Duty Transfers

Ideal for sampling, racking, and short transfer applications

General Purpose Beverage Handling

Reliable performance for water-based products

CIP Solution Circuits

Chemical-resistant options for cleaning processes

Bottling Lines

Precision flow characteristics for filling operations

Laboratory and Quality Control

When cleanliness and visibility are paramount

About Our Range

At Ausquip Industrial Hose, we've curated a premium selection of hoses specifically designed to meet the demands of food and beverage processing operations — from production to final fill.

Whether you are transferring liquids, powders, oils, chemicals, or cleaning media, we have hose solutions designed to meet the demands of modern food and beverage processing environments.

We supply hoses in bulk rolls, cut lengths, crimped assemblies, or band-it clamped configurations to suit production lines, washdown systems, processing equipment, transfer applications, and packaging operations.

Our range supports a broad range of food and beverage manufacturing applications including product transfer, ingredient handling, filling, packaging, CIP systems, washdown, and sanitary processing — with a strong focus on hygiene, durability, compliance, and flow efficiency.

Backed by decades of hands-on fluid transfer experience, our team works closely with manufacturers to deliver practical, reliable hose solutions that perform in demanding processing environments.

Hose Certifications

Quality and Assurance
in your hands

Manufactured without polycyclic aromatic hydrocarbons often found in oil based materials

Manufactured without phthalates, a chemical commonly found in plastics and elastomers to make them more flexible

Complies with European standards for materials intended to come into contact with foodstuffs

D.M : Complies with Italian Health Ministry for materials in contact with food

Meets German Federal Institute for Risk Assessment guidelines for food contact materials

Manufactured according to Good Manufacturing Practice (GMP) for food contact materials
