

Digitalize production.

Elevate efficiency.

Evocon is a visual and user-friendly OEE software that helps manufacturing companies improve productivity and remove waste as they become better.

Monitor production & shifts in real-time

Track & analyse machine downtime

Measure the heartbeat of your factory

Increase production efficiency

Improve quality & reliability

Empower teams with production data

Alvar Kinnapuu
VP Operations, Sales & Marketing, Yara
Without Evocon, we would not have been able to realize the step-change in our continuous improvement program. Visual Management at its best.

Karol Sokolowski
Production/Operational Director, H+H Poland
Evocon is the best product to automate production reporting process and to teach operators the connection between data collection and reporting.

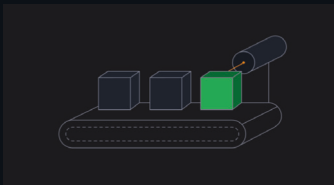

OEE software. Easy to use. Easy to understand.

Getting started with Evocon is as easy as 1-2-3

1. Install

Sensor is placed to detect products on a production line or machine and connected to Evocon's IIoT device.

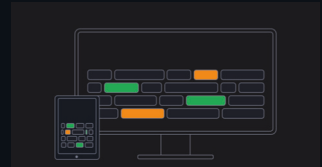

2. Connect

The device is connected to the internet which sends collected data to Evocon's OEE software for analysis.

3. Visualize

Collected data is displayed on the shop floor where operators can use it to defeat inefficiency.

To use Evocon, there is no need to install any programs. Just go to our website, log in, and see the collected data and reports.

Start discovering your **hidden factory** with Evocon's **30 day free trial**
